

MEDIUM PPU - PANASONIC

PORTABLE PRODUCTION UNITS

This is a very versatile 8 camera PPU that utilises the Panasonic AV-HS450 desk. This powerful mixer provides 16 inputs, six with colour correction and four with up/down conversion. The switcher supports HD and SD formats and together with its built in dual screen multi-viewer monitoring, it provides a small yet powerful system.

The footprint of the directors' rack has been drastically reduced, and a custom table creates a comfortable and practical working position. Two 30" Production Monitors provide monitoring of all sources, including frame stores.
