

XL PPU

PORTABLE PRODUCTION UNITS

These state of the art broadcast HD compact flyaway systems can work as either SD, HD or both using the onboard mixer scalers and modular converters. These systems utilise multiple 'standard' 4 camera and VT rack formats with comprehensive video and audio monitoring. Built around 64x64 SD/HD routers, and 48 input Grass Valley Kayak switchers, these systems offer a powerful and flexible solution for the most demanding of events. Audio is available via the router and DM1000 mixer.

Communications are provided by the Telex Zeus matrix which provides both local panel comms and external 2 and 4 wire circuits. This enables easy integration with outside broadcast facilities and show comms. The production team is able to view everything via a pair of 47" HD LCD screens that can show anything from 2 to 32 pictures in SD or HD.

Technical details

Video	1 x Grass Valley HD Kayak 2.5 ME 48 in 24 out, 8 full DPM, RAM Recorder, 8 x Scaler inputs, 64 x 64 Leitch router,
Audio	1 x Yamaha DM1000 audio desk, analogue + AES in and out, 32 x32 Analogue stereo router, 32 x 32 AES router, 1 x TSL monitoring
