PRG Services & Solutions

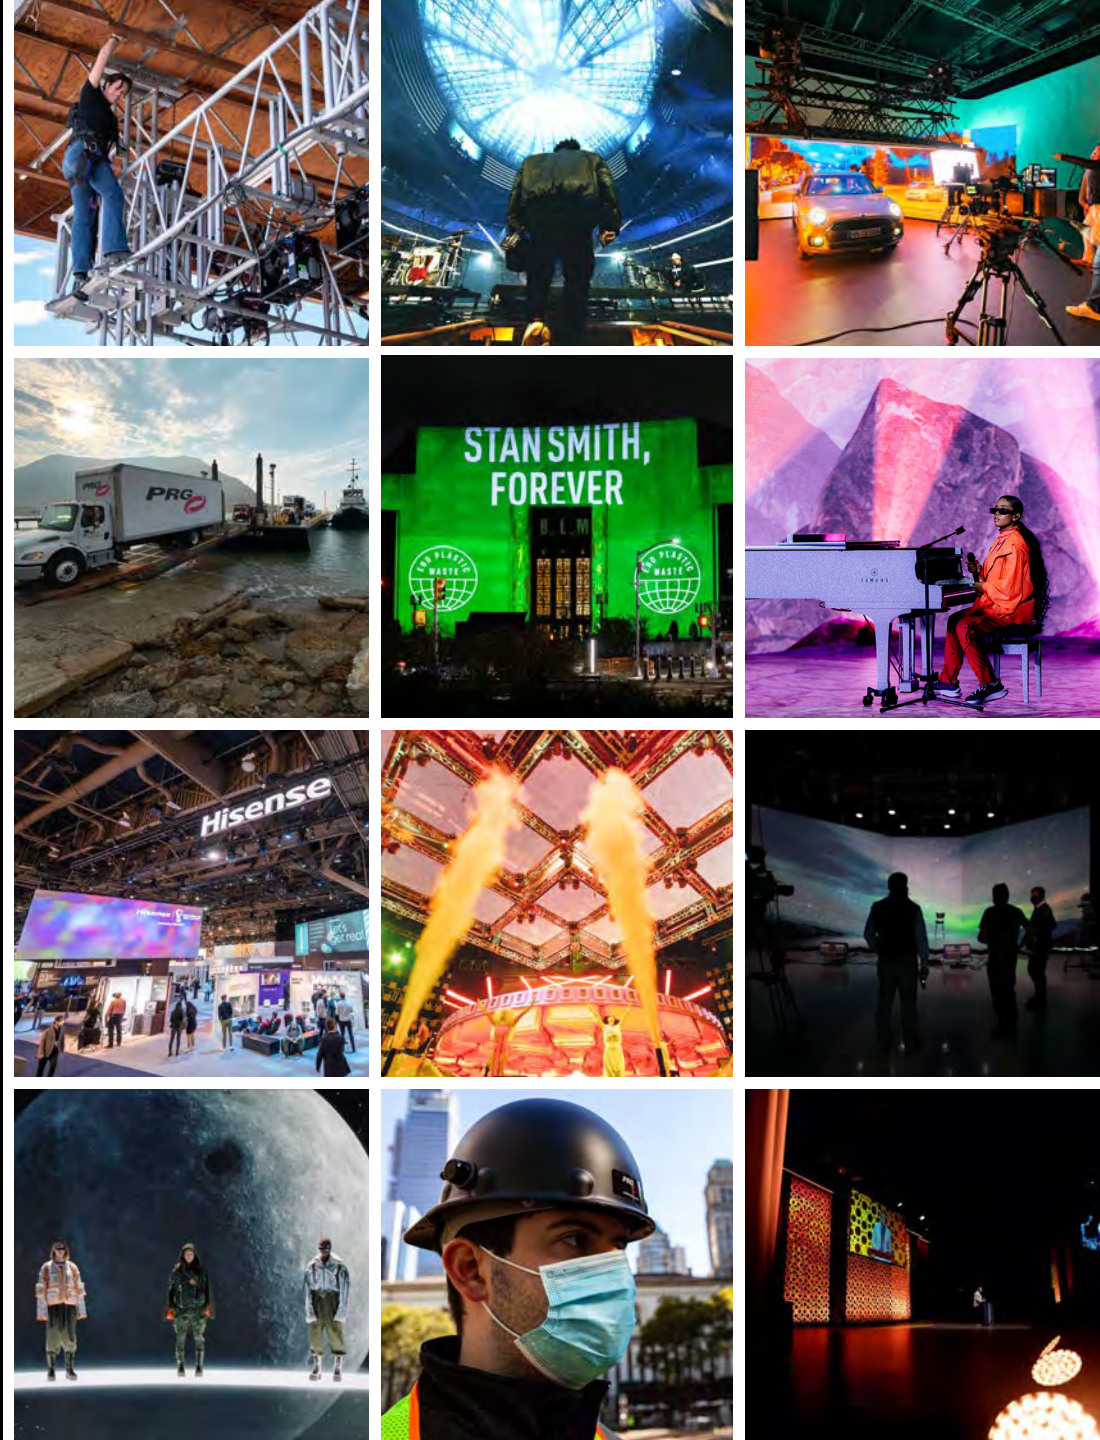

PEOPLE. PRODUCTION. POSSIBILITY.

Our people are our secret sauce. They create our world-class solutions, bringing their skillsets, experience and the qualities of our culture: passion, agility, customer focus.

It's what we do: Realizing our customers' ideas and creativity in every media form. Production is a mindset at PRG, laser-focused on real customer and project needs and geared to overcoming any challenge.

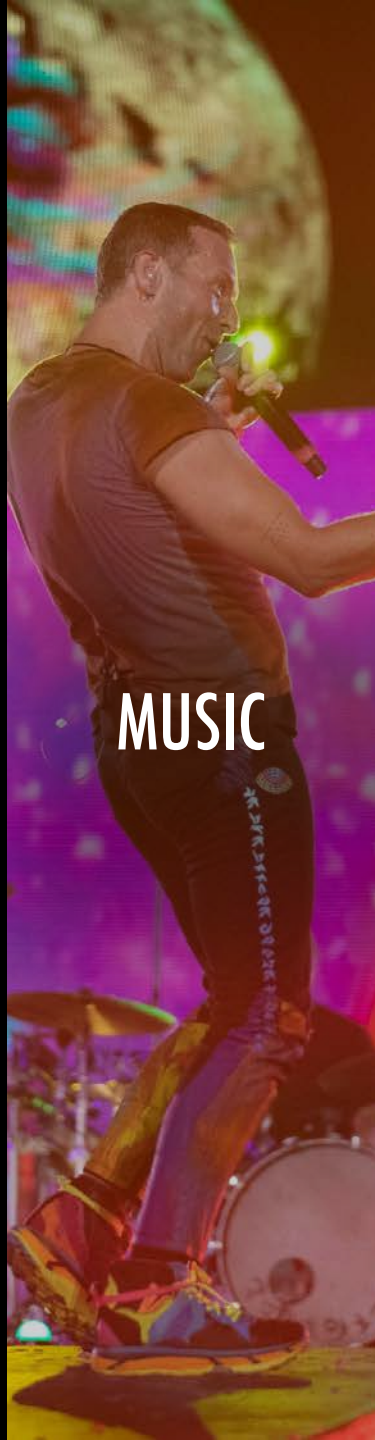

The payoff. The achievement of a great show; the communication of a new idea; deepened connection with fans and audiences; creative boundaries blown open; expectations surpassed.

WHO WE ARE

PRG powers some of the most important moments in popular culture across the event and entertainment landscape.

We unlock the power of technology to engage and delight audiences in tv, film, broadcast—and every form of media and live experience.

VIRTUAL PRODUCTION

WHAT WE DO <<<

PRG offers the most comprehensive suite of production services available to the television, broadcast and film markets today.

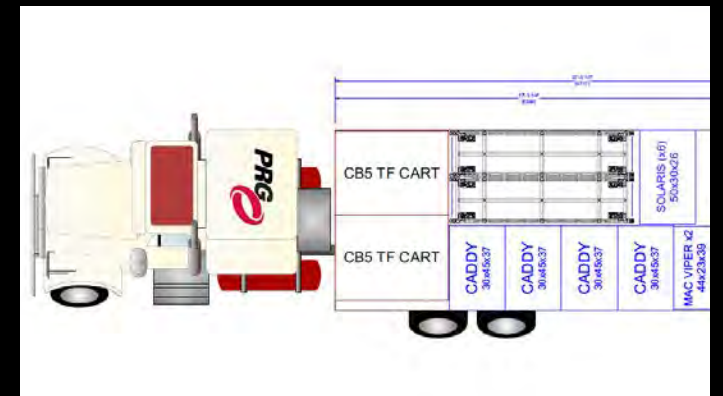

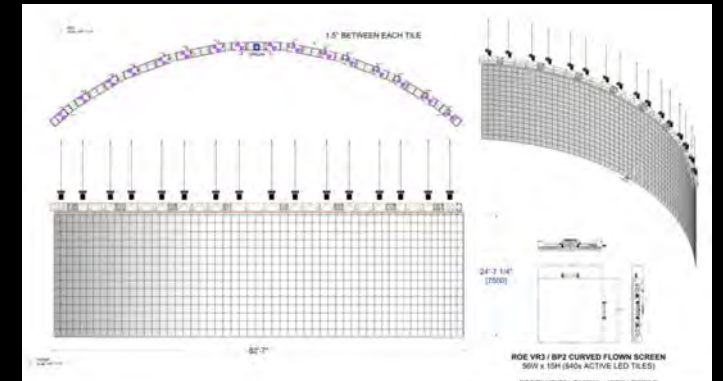

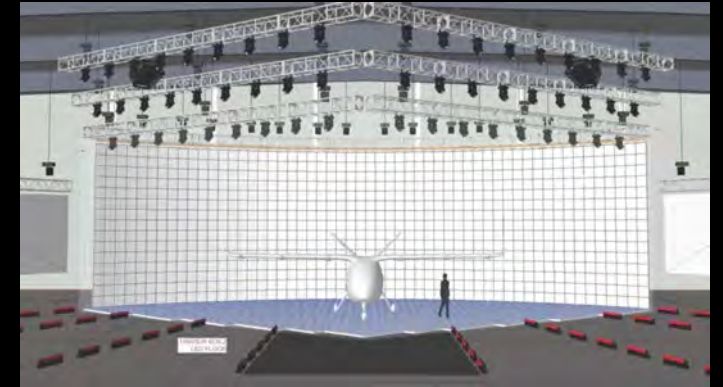

Engage us as a 360° provider or for solutions in specific disciplines.

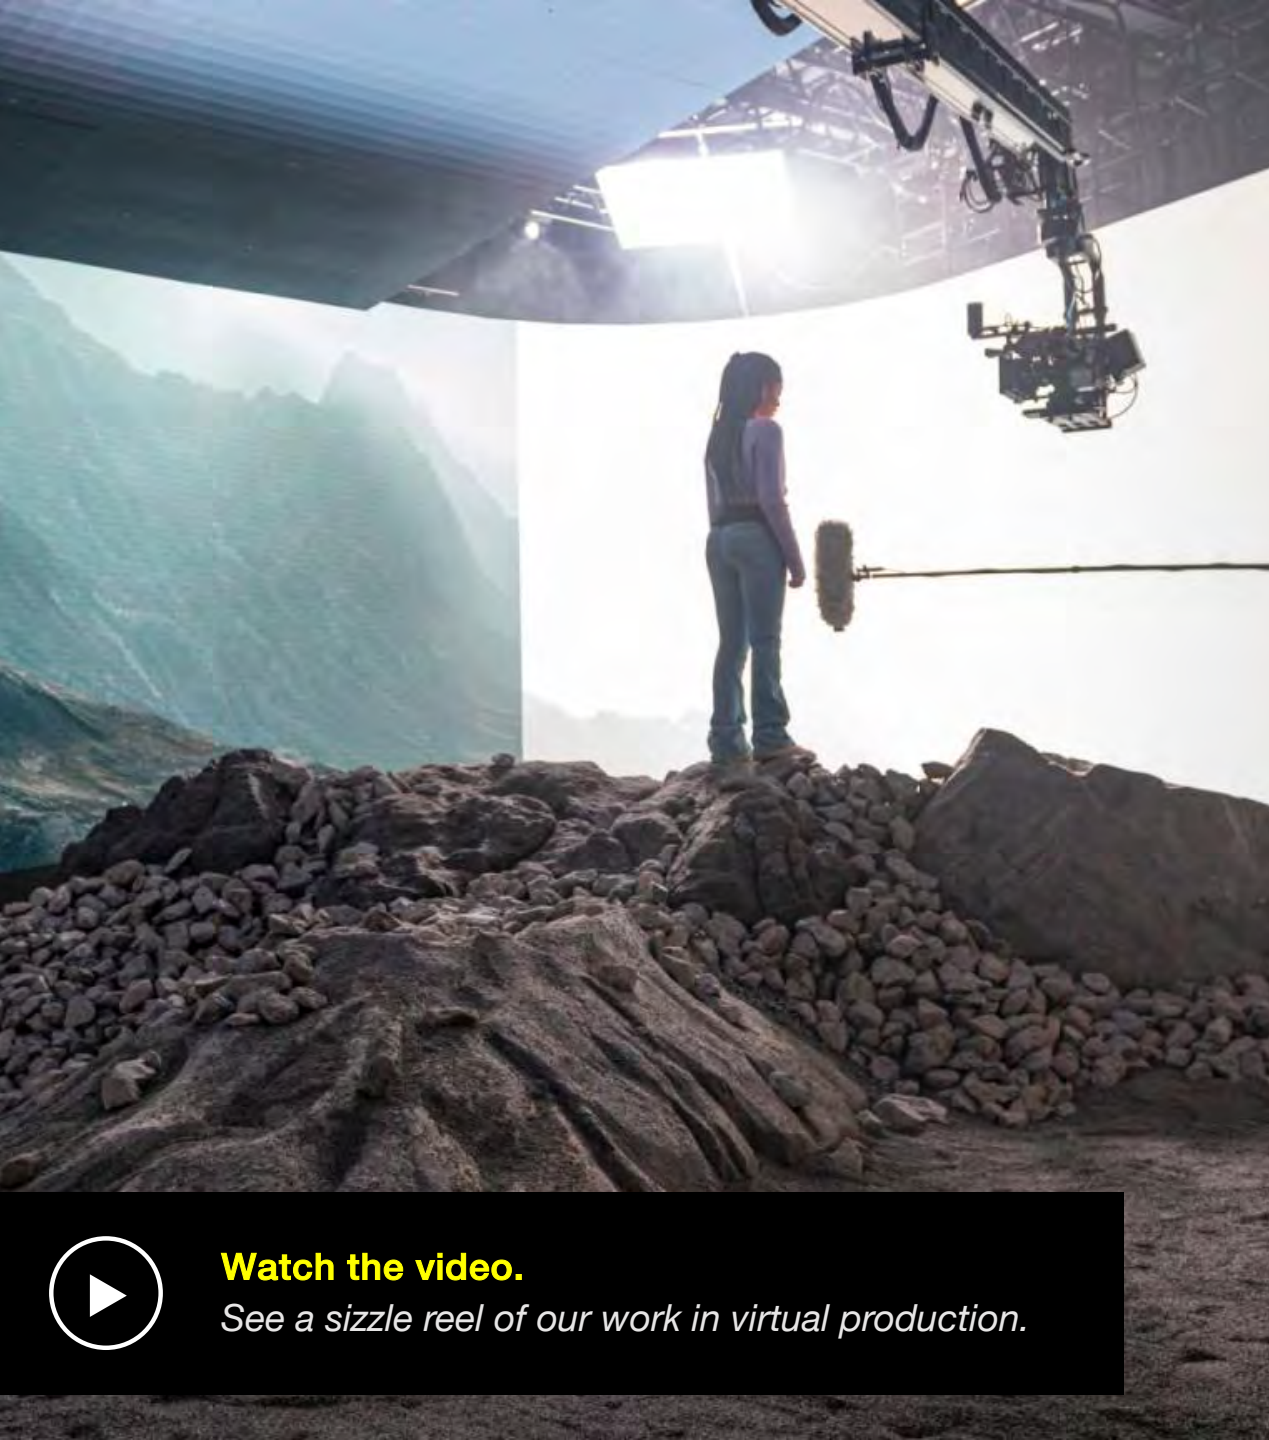

ENGINEERING

FROM DRAWINGS >>> TO ONSITE EXECUTION

From concept to technical reality, each project is custom engineered to fit all elements into a solution that will match your budget and venue.

- CAD Drawings and Renderings
- Engineering Sign-off and Wet Stamps
- Tech Packs
- System Diagrams
- Pixel Maps
- Lighting Designs
- Audio Plots
- Rigging Plots
- Truck Packs

VIRTUAL PRODUCTION ◀◀

The umbrella term Virtual Production uses technology to join the digital world with the physical world in real-time. It enables filmmakers to interact with the digital process in the same ways they interact with live-action production.

- LED screens and/or projection create natural-looking backgrounds and lighting reflections on set
- Controlled, immersive environment allowing talent to respond and visualize
- Ability to bring a specific location to any stage and shift instantly from day to night
- In-camera Visual Effects (ICVFX)
- Content is controlled on set from the Brain Bar, the central nervous center of a virtual production, where real-time hardware and software are operated.

Watch the video.

See a sizzle reel of our work in virtual production.

ENHANCED ENVIRONMENTS <<<

In PRG's proprietary workflow, Pre Recorded Plates or 3D Content brings the location to the studio with widely praised fidelity and realism.

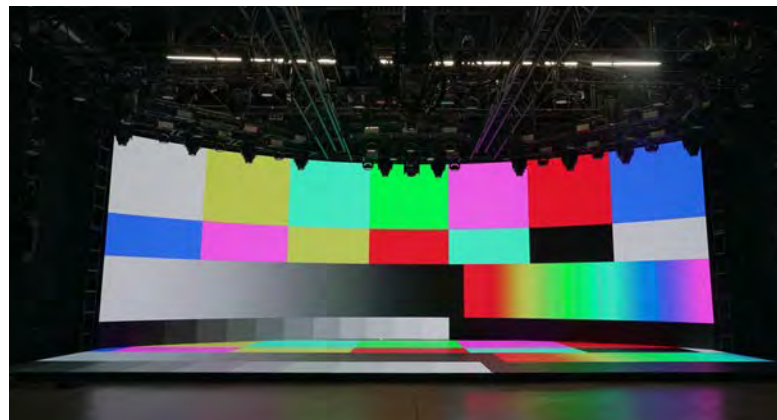

- Go-to solution for Vehicle Process Work
- Leverages PRG's industry-leading video, LED technology and media servers
- Flexibility to change locations and adapt setting from day to night in one stage location
- Significant advantages over traditional green screen technology, favored by leading DPs
- Reduced post-production costs

Enhanced Environments using Virtual Production and ICVFX are reimagining the methods of storytelling and content creation across a growing number of industries. Through advancements in LED display and brain bar technology, it empowers the world's leading visual storytellers to deliver deeply immersive experiences that engage audiences like never before.

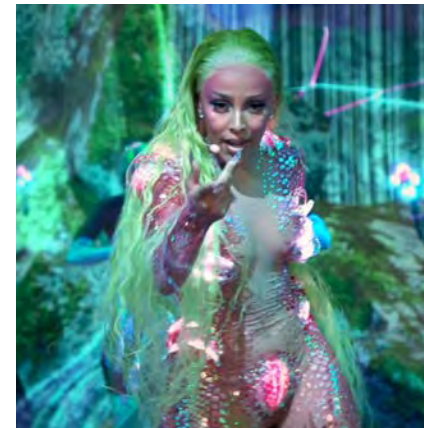

EXTENDED REALITY (xR)

Extended reality is a catchall term for several different but related technologies. It rolls together similar acronyms like VR, AR and MR. The technology allows you to blend virtual and physical worlds together using AR overlays and MR in live production environments.

Capturing for a recorded or a live broadcasted performance, our global offerings provide full-service support to a range of productions including TV shows, award ceremonies, music videos, streaming concerts and commercial shoots.

From Katy Perry's groundbreaking performance on American Idol, to Doja Cat's out of this world VMA appearance, **we've pioneered extended reality** workflows.

35LIVE! CINEMATIC MULTI-CAM

35LIVE! combines the power and immediacy of live broadcast with a big-screen aesthetic.

- PRG's 35LIVE! Technology re-defines the traditional multi-camera approach, with digital 35mm cinema cameras and lenses
- A new workflow focusing on the cinematic aesthetic, using modular fly-pack systems and/or full truck capabilities for any scale production
- Special focus towards the cinematographer and the aesthetic vision of the project
- Application to live broadcast and music events

RELEVANT EXPERIENCE

We bring creative vision to life. ▶▶▶

A photograph of the RuPaul's Drag Race cast standing on a stage. From left to right: Michelle Visage in a white dress, RuPaul in a red sequined gown with a large blonde wig, Carson Kressley in a black and white patterned suit, and Jai Rodriguez in a black jumpsuit. The background is a wall of purple and blue illuminated squares. The floor is lit with purple and blue lights. The overall atmosphere is vibrant and theatrical.

RUPAUL'S DRAG RACE

UNSCRIPTED TV

Notable Projects

American Ninja Warrior, Big Brother, Survivor, Lego Masters, Master Chef, RuPaul's Drag Race, America's Got Talent, Great Food Truck Race, Live PD, Live Rescue, Love is Blind, Real Housewives of Atlanta, The Masked Singer, Titan Games, Top Chef, World of Dance

WOMEN OF WRESTLING (WOW)

PRG provides cameras, engineering, infrastructure and labor to support the fastest growing wrestling program in the nation, WOW - Women Of Wrestling.

- WOW launched in September 2022, and has seen its weekly television audience grow each week with its viewership averaging over 340,000 total viewers per episode, resulting in WOW having the highest viewed wrestling program for women.

AWARD SHOWS & SPECIALS

PRG is a trusted technical partner for countless award shows and special performances including:

The Grammys, The CMAs, CMT Giants, Billboard's Women in Music Awards, The Oscars, The Emmys, The VMAs, Premios Nuevos, The Apple Music Halftime Show, Univisionarios, The Latin American Music Awards, SNL, and many more...

PEN15

SCRIPTED TV

CHICAGO SERIES (FIRE, MED, PD)

We provide continual support for Dick Wolf's exciting franchise and its noteworthy contribution to the booming Chicago production industry

- PRG provides camera packages including ARRI Alexa Mini and ARRI Amira cameras to all three shows
- Lenses include Fujinon Cabrio, Angenieux zoom, Zeiss prime and accessories
- Local PRG Chicago offices allow for swift gear swaps and low transportation costs
- Provided entire camera package for all three shows

LAW & ORDER: ORGANIZED CRIME

PRG built and designed the Enhanced Environments car process stage for Law & Order Organized Crime, Blue Bloods & FBI: Most Wanted.

- This gives the the production team the ability to from day to night or change locations with a push of a button.

OZARK

Our services for the Netflix crime drama contributed to the booming Georgia production industry for all four seasons.

- PRG provided camera and camera support for the series
- Local PRG Atlanta offices allow for swift gear swaps and low transportation costs

THE IRISHMAN

FILM

Notable Projects

Joker, Apollo 10 ½, Ant-Man & the Wasp, Aquaman, Black Panther, Guardians of the Galaxy Vol. 2, The Many Saints of Newark, Moonlight, Murder on the Orient Express, Solo: A Star Wars Story, The Fate of the Furious, The Hunger Games, The Irishman, Unhinged

EVERYTHING EVERYWHERE ALL AT ONCE

PRG's proprietary Mbox Studio+ was used by Gaffer Matthew Ardine for the stunning, fast-paced portal jumping scenes throughout the film.

- Mbox was attached to the lighting console so that it could be used as a manipulated light source
