Emergency Response Services
As the leading provider of production services in the live event space, PRG provides a unique set of capabilities of value to government, hospitals, NGO’s and others at the forefront of the COVID-19 emergency.

With locations and experts across the U.S., we stand ready to support your response effort.
Expertise + Inventory

At the heart of the company is a community of solutions providers working in disciplines directly applicable to your emergency response. Here’s what we can contribute...

**Single Sourcing**
Depth and breadth of experience allowing us to act as a single point of accountability, plus established partnerships to augment our own services when needed.

**Inventory**
The largest inventory of production equipment available and the ability to deploy it anywhere.

**Agility**
We are already retooling our manufacturing and workflows to produce fast solutions at any scale.

**Expertise**
The most knowledgeable staff in critical specialties like power and data distribution, temporary structures, lighting, audio and wireless communications.

**Speed**
We understand that events are moving quickly for our customers. Our scale and knowledge allow us to respond.

* Partial list of emergency response services shown. Others available.
Livestreaming

PRG provides essential livestreaming services that facilitate communications when time constraints or social distancing make in-person interaction impossible.

- Meetings, conferences, lectures, panels, town halls, training and more
- Supports slides, video or other forms of on-screen information
- Streaming from or to any location with multiple points of origination
- Secure sign-on or widescale distribution options
- Customizable viewing platform
Laptop Rentals

PRG maintains an expansive inventory of laptops, now in high demand due to work- and learn-from-home programs.

- Windows
- Mac computers, and
- Tablets
- Complete solutions available, inclusive of connectivity and IT support
COVID-19 Related Work Underway

We are currently contributing to the COVID-19 response across the U.S.—and the globe.
New York PPE Production

PRG is one of three companies selected to manufacture a new face shield design developed by NYU faculty and researchers to address a critical shortage.

- Total effort targets production of 300,000 face shields in two weeks
- Production in PRG Scenic Technologies facilities in New Windsor, NY and Las Vegas
- All production to adhere to shelter-in-place and social distancing directives by reworking traditional assembly line procedure
- Smaller manufacturers like PRG sought out “as they have the resources to more quickly ramp up production” (NYU, 3/27/2020)
- Design employs the fastest and most versatile production methods at the lowest material and production costs.
Temporary Testing Facility

A design solution for portable COVID-19 testing facilities.

- Designed for scalability up or down. (Currently rendered with 9 testing rooms and room for staff wash-up)
- PRG provides lighting, audio, power, communications (radios)
- Produced on-demand through an alliance with a provider for walls and roof
- Compliant with building codes and guidelines related to COVID-19 testing
- Fast, turnkey and ready to activate for government or hospitals
