**Product:** Mbox Media Server  
**Manufacturer:** PRG  
**Subject:** Mbox Director Software Version 4.2.1  
**Bulletin No:** MBX-032  
**Date:** November 8, 2017

## INTRODUCTION

---

### Mbox Director Software Version 4.2.1

Software version 4.2.1 is now available for the Mbox Director application.

### Overview

Mbox Director software version 4.2.1 provides minor bug fixes and adds several new features. A list of affected items can be found below.

#### New features:

- + Cut/Copy/Paste of scenes in scene list. When pasting, scenes will be placed after the currently selected scene.
- + Added a preference in Scene menu to cause scenes only to be triggered by timecode when their exact time is reached. i.e. The most recently passed scene is not recalled if timecode jumps to a time after that scene (which is the standard operation).

#### Corrected Issues:

- + Corrected user interface font issues for Submaster labels (e.g. ②) on submaster window, scene list, and parameter area.
- + Fixed issue where autofollows run at 2x normal speed in submasters if timecode is running.
- + Fixed terminal hang at application launch when start scene(s) both start the playhead and recall a submaster snapshot at the same time.
