

Ingest System

PRG | Los Angeles, CA | 2018

**SEE
WHAT WE
CAN DO
TOGETHER**

What is the Ingest System

- Live capture
- Live transcoding
- Instant copy processes
- Data push via 10GigE network to External NAS drive
- Integrated audio embedder
- Video matrix for signal distributions
- Capability to transcode additional H264 file
- Bands such as Metallica, Beyoncé and U2 are users of the Ingest System

Ingest Server

- Each server comes with 4 SDI inputs
- Each SDI input can handle everything up to 3G
- Together all 4 SDI channels can be used as 1 UHD 4K input
- Audio must be embedded in the SDI signal
- Wide range of codecs available

Places of Usage

- Concert touring Archive
- DVD Live shoot
- Multi camera Film shoot
- Multi camera corporate event
- Everything Archive related

Other Option

- Add an Edit suite to the network and access the content while it is recording.
- We just did a sub cut while recording at the Global Citizen event in Johannesburg with Beyoncé last week. We recorded on 24 channels and created a sub cut to rebroadcast after the show. The cut was finalized minutes after the show.
- Proxy files can be created in addition to the regular Pro Res HQ.
