

xR Stage

A completely scalable extended reality solution

Our xR Stage is an immersive, extended reality environment able to accommodate any pre-recorded or live production. It is designed to provide full control over both the lighting and the filmed scenes in a real-time recording environment

We have developed a workflow with guidelines for COVID-19 in mind. A Furio track remote controlled camera minimizes the bodies needed on the stage for more efficient social distancing. Graphics can be rendered and displayed on physical LED screens, onto the broadcast feed only or composited together - allowing 3D content to appear both in front and behind a performer. Performers can be tracked in the 3D space, enabling interactions with augmented graphics. Three-dimensional content, products or lights can be attached to a person - appearing perfectly real in the broadcast output.

Workflow:

- Unreal or Notch – Disguise – Stype – Blacktrax
- All in 1080p@60 or UHD
- Camera via Furio on a track, controlled remotely
- Allows for real-time adjustment of content
- 3D Previsualization
- Content and lighting integrated
- Technical services included
- Client will receive a copy of the show

Green Room Trailer:

- AC in unit
- Internally lit
- Private entrance to stage available upon request
- First room: 15' long, 8' wide, 8' tall
- Main room: 20' long, 12' wide, 8' tall
- Rear room: 9' long, 8' wide, 8' tall
- Subject to availability
- Catering space and production offices available

The xR Stage Setup

Located at our Glendale facility in Los Angeles, the xR Stage offers a structured workflow and custom engineered products complete with an LED stage and floor, two cameras, full lighting rig, Blacktrax system and media servers.

Working Safely, Together

We are taking all possible precautions to ensure the safety of our employees, customers and visitors during the COVID-19 pandemic by implementing new measures and guidelines including the use of personal protective equipment, increased sanitation procedures and a checkpoint system.
