

# VIRTUAL PRODUCTION STUDIO

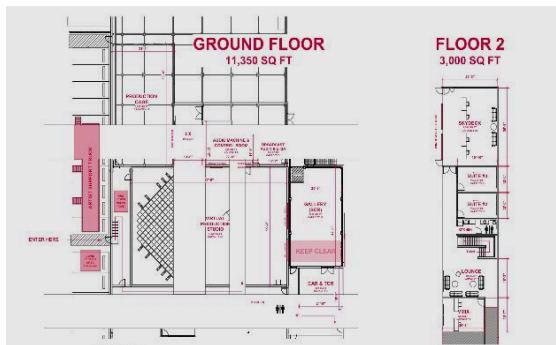

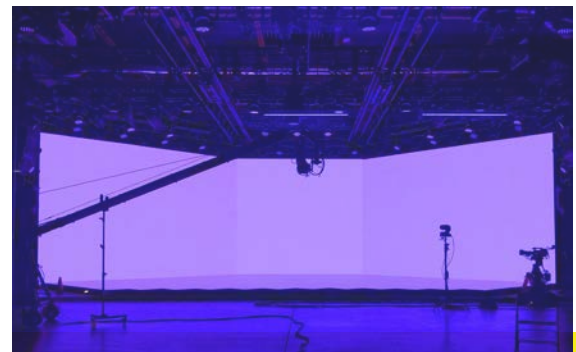

Los Angeles

## A completely scalable extended reality solution

PRG's Virtual Production Studio is an immersive, extended reality environment able to accommodate any pre-recorded or live production. Equipped with an xR Stage, it is designed to provide full control over both the lighting and the filmed scenes with real-time visualization and full broadcast capabilities. This cutting edge workflow and technology can be applied to everything from award shows to corporate events, music videos, livestreamed concerts or commercial shoots.

### STUDIO SITE PLAN

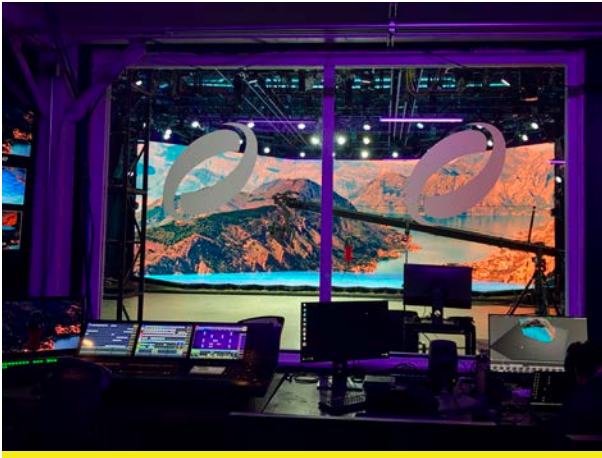

Our 14,350 sq ft studio has multiple work zones available, including an isolated control room with a glass enclosure, green rooms and production offices. We invite you to customize the rentable space to the needs of your production. View our full studio site plan and stage drawings [here](#).

### PART OF OUR STUDIO NETWORK

In addition to our Los Angeles location, we have Digital Studios in New York, Nashville, Las Vegas and Orlando. These environments were similarly created for both pre-recorded and live content for digital events and built for safe, efficient production at any scale.
