

SOFTWARE RELEASE NOTES

Product: Mbox Player (Media Playback Software)
Manufacturer: PRG
Subject: Software Version 2.0.3
Bulletin No: MBX-080
Date: September 1, 2026

INTRODUCTION

Mbox Player Software Version 2.0.3

We are pleased to announce that software version 2.0.3 is now available for the Mbox Player Media Playback application. Software version 2.0.3 addresses issues in the Mbox Player 2.0 application.

Compatibility with Apple Silicon, macOS Versions, and Show File Compatibility

The Mbox Player application to be a universal application, running natively on both Apple Silicon and Intel CPUs. Mbox Player v2 requires a minimum macOS version of 12 Monterey to install and run, and is compatible with all newer versions of macOS. If you have compatibility issues when using Player v2, please contact MboxSupport@prg.com for assistance.

The Mbox Player v2 application uses the same fixture and showfile format as Mbox Player 1.3. Show files created with Mbox Player v2 are not compatible with versions of the Mbox Player application prior to v1.3. Versions of Mbox Player prior to v1.3 will display an error message when loading an show file from v2 and will require a new show file to be started. Show files created by versions of Mbox Player older than 1.3 should not be opened and used with Mbox Player v2, as compatibility cannot be guaranteed. Start a new show using Mbox Player v2 and then add clips as required.

Mbox, PRG, and your Personal Data

Please refer to the release notes for Mbox Player software version 2.0 (MBX-076) for information regarding PRG's use of your personal data. Please contact MboxSupport@prg.com if you have any questions.

Corrected Issues

Mbox Player:

- + Fixes for audible disturbances in audio output .
- + Stop flicker in and out of fullscreen mode at first launch caused by NDI output setup.
