

Filled Cloth & Gauzes

CYCLORAMAS & SCRIMS

Cycloramas are made commonly made from seamless white filled cloth, which is tensioned to create a flat surface and use as a backdrop onto which coloured lights are projected.

Filled Cloth is a gauze style fabric that has been filled in with extra woven fibres. PRG also offers a heavy weight cyclorama canvas large enough to provide a seamless expanse.

To create onstage scenic and lighting scrim illusions, gauze is used most often for this effect. PRG Show Drapes manufacture various types of gauze fabrics, the most popular being sharkstooth gauze. Sharkstooth gauze can appear completely transparent or opaque depending on how it is lit. This fabric is also known in the industry as scrim. Gauze often is placed in front of a cyclorama to create depth in the lighting effect of a sky.

CYCLORAMA CANVAS

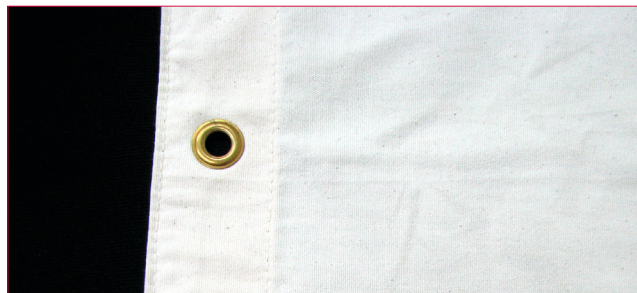

A heavy weight canvas alternative to the traditional Filled Cloth, the PRG Cyclorama Canvas is available up to 10 metres wide and 60 metres long, providing a huge seamless expanse. Currently installed into various large Television Studios, the Cyclorama Canvas is a hard wearing material used to withstand the rigours of a busy studio. It lights well and is flame retardant.*

FILLED CLOTH 10 PT CYCLORAMA CLOTH

Filled cloth is the most common material used for Cycloramas or backdrops. It has a soft weave texture which is an ideal surface for lighting and special effects as it gently diffuses light. Available in wide width it allows the manufacture of seamless full stage cloths.

SHARKSTOOTH GAUZE 6PT

A Sharkstooth Gauze is traditionally used to make a scrim. The fabrics unique design result in a stage cloth that can appear opaque when lit correctly from the front and totally dark behind, or can appear translucent with no front lighting and when object or people behind it are lit. The cloth has a rectangular weave that can be painted and will still retain the ability to disappear. Sharkstooth gauze is available in wide widths allowing a full stage seamless scrim to be manufactured.

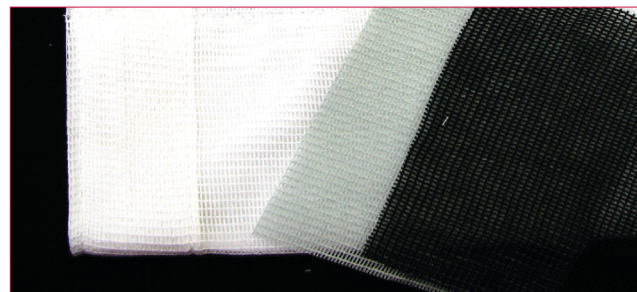

Cyclorama Canvas

- MADE OF 100% COTTON
- WEIGHS 250G/M2
- 1000CM WIDTH
- AVAILABLE IN NATURAL COLOUR
- FLAME RETARDANT
- CERTIFICATED TO ANZ 1530 PARTS 2 & 3
